General Information

- **The Spring 2025 Plant Sale is online only.** Garden members will have exclusive shopping beginning at 10 AM on Friday, April 25TH
- Be sure you are receiving Garden emails to receive your early entry code and link to the online sale.
- The online sale will be open to the public beginning at 10 AM on Saturday, April 26TH and available until 5 PM on Sunday, April 27TH.
- Pickup is scheduled for the following Thursday, May 1ST thru Sunday, May 4TH. Follow the instructions online for selecting your pickup date and time.

Terms of Sale:

Please note—this catalog is not a firm list of all plants that will be available. Some of them may not be ready at the time of the sale and will be withheld. Additionally, we may add plants for sale at the last minute.

While there is no expressed guarantee on any of the plants, staff from our Horticulture Department can always be reached at askaplantquestion@nbgs.org to help you select the best plants for your situation and later they can offer advice if the plants are not thriving.

This sale is one of our largest annual fundraisers, and one that our staff prepares for year-round. More important than the money, it is a chance to get quality plants out into the community so that we can all grow a greener world!

Frequently Asked Questions Spring 2025 Online Plant Sale

Question: Where is the plant sale located?

Answer: The 2025 Spring Plant Sale is located online this year. You will not need to come onsite to purchase your plants.

Question: I am a Garden Member and I did not receive my email with the **PASSWORD** to access the site or the **COUPON CODE**.

Answer: Please give us a call at (757)-441-5830 EXT. 0 to update your email and send over the access code. Members gain access to the site at 10 AM on Friday, April 25, 2025.

Question: Can I purchase a Garden Membership before the sale begins?

Answer: Yes, you are able to purchase a membership before the sale. Members receive access a full day prior to the public sale and will receive 10% off their order.

Question: I am a Garden Member and noticed that I didn't get my member discount. How to get the discount after the sale is complete?

Answer: Please give us a call at (757)-441-5830 EXT. 0.

Question: Will you have plants for sale during the Plant Sale pick-up?

Answer: No, we will not have more plants for sale on the pick-up dates. Please stay tuned with our social media for updates on future plant sales during our fall season.

Plant Sale Pick Up Frequently Asked Questions

Question: Where is the plant sale pick up located?

Answer: The Plant Sale pick-up is located in our picnic parking lot. Guests will be directed from the tollbooth to follow the signs to the pick-up location.

Question: What do I need to bring with me to pick up my plants?

Answer: We ask that you bring confirmation of your order. This will be in form of an email that you will receive after your order is complete.

Question: I didn't see the opportunity to change my scheduled pick-up time. How do I change it to a time that works for me?

Answer: Pick up times are auto generated to the earliest time available. If you find that you have been given a pick-up time that does not work for you, then please give us a call at (757)-441-5830 EXT. 0 to change the pick-up time.

Question: I purchased a few times during the plant sale and it scheduled me multiple different pick up times. Do I need to come for each of the pick-up times or when can I pick up my plants?

Answer: If you have multiple orders with us we will automatically combine all of your orders and have all of your plants ready with the first pick up time that you were given. NOTE: You must use the same name, email, and address for us to combine orders.

Question: What if I need to pick up for someone else that ordered plants during the sale?

Answer: We ask that you have the confirmation email to verify you are picking up the correct order. If you need the order combined with your pick-up time please give us a call at (757)-441-5830 EXT. 0.

Abelia grandiflora
'KEYFLY' BRILLIANTINA™

Proven Winners

BRILLIANTINA™ Abelia — has stunning semi-evergreen foliage that is a combination of yellow, green, and orange — all held on red stems. Like other selections, the summer blooming white flowers are fragrant and attract hummingbirds and insect pollinators. Unlike other selections, BRILLIANTINA™ has a compact, well behaved habit with minimal “stray hairs” in constant need of pruning. It prefers full to part sun in moist well drained soil; deer resistant; heat and humidity tolerant. **\$25.00**

3-4' T x 3-5' W

Zones 6-9

Pot Size: #1

Current Plant Size: 8 in. x 8 in.

Anisacanthus quadrifidus var. *wrightii*
'Pumpkin'

photo courtesy of JCRA

'Pumpkin' Texas Firecracker — (a.k.a Hummingbird Plant) is an upright, deciduous shrub with an informal, spreading appearance. It is native to south-central Texas and northern Mexico. The slender, brittle stems have attractive, peeling bark. Soft orange, tubular flowers (1-1.5" long) appear in abundance during bloom periods, most often from spring to late summer. Extremely attractive to hummingbirds, butterflies, and other pollinators. Deer tend to avoid this plant. Prefers full sun in well drained soil, very drought tolerant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$15.00**

5' T x 4' W

Zones 7-10

Pot Size: #1

Current Plant Size: 15-18 in.

Buddleia x 'SMNBDO'
PUGSTER PERIWINKLE®

Proven Winners

PUGSTER PERIWINKLE® Butterfly Bush — is part of the Pugster® series, whose selections are known for their dwarf shrub size, but they have full-size flowers with thick sturdy stems, and they are very cold hardy. PUGSTER PERIWINKLE® has dense clusters of fragrant purple flowers that bloom from early summer through fall - without deadheading! Like all butterfly bushes, it is a butterfly magnet. Prefers full sun in moist well drained soil; heat and drought tolerant once established; deer resistant. **\$25.00**

Callicarpa americana
American Beautyberry

American Beautyberry — is one of our best Southeastern and Coastal Virginia native shrubs. Small lavender pink flowers bloom in summer attracting butterflies and other insect pollinators. However, the real show is in the early fall when bright purple berries adorn the branches providing a feast for the eyes and a tasty treat for birds and other wildlife. If you are adventurous, the fruit can be eaten fresh, or processed into jelly. The foliage has mosquito repelling properties, and it turns a nice soft yellow in the fall. Prefers full sun in moist soil where it will produce the most fruit, but it will also grow in light shade. Once established it can tolerate both occasional drought and wet soil. Blooms and fruits on new growth, so occasional winter pruning is recommended. **\$30.00**

4-6' T&W

Zones 6-10

Pot Size: #3

Current Plant Size: 3 ft.

Callicarpa x 'NCCX2' **PEARL GLAM®**

© Proven Winners® ColorChoice®

Pearl Glam® Callicarpa — is showy starting in spring, with dark purple foliage from the get-go. Late summer brings white flowers which later yield violet-purple berries by the hundreds. Upright habit makes this a space-saver compared to more conventional beautyberry varieties. An unusual foliage color, and a different habit make this a new twist on beautyberry. Prefers full sun in moist well drained soil; deer resistant. **\$25.00**

4-5' T x 3-4' W

Zones 5-8

Pot Size: #1

Current Plant Size: 12 in.+

Calycanthus floridus

Sweetshrub (a.k.a. Carolina Spice) — is an old-fashioned favorite, native to Coastal Virginia. It is a dense, rounded deciduous shrub with a suckering habit, and grows 6-9' (less frequently to 12') tall with an equal or slightly greater spread. The unusual, 2" maroon flowers bloom in late spring and have a fruity aroma. Flowers give way to brownish, urn-shaped fruits (seed capsules) which mature in fall and persist throughout the winter. Lustrous, dark green leaves to 6" long turn golden yellow in fall. Leaves are aromatic when bruised. Another common name is strawberry bush, in reference to the fragrant blooms which have been described as combining hints of pineapple, strawberry and banana. Prefers full to partial sun in evenly moist well drained soil, once established it is tolerant of occasional droughts and floods, deer resistant. **\$30.00**

6-9' T & W

Zones 4-9

Pot Size: #3

Current Plant Size: 3 ft.+

Ceanothus americanus

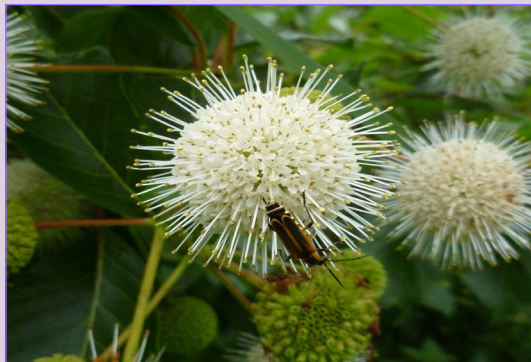

New Jersey Tea — is a deciduous shrub that is native to eastern and central North America, including Coastal Virginia. It is low growing with a rounded crown and typically wider than tall. In early summer it is covered with fragrant clusters of creamy white flowers that are highly attractive to butterflies, bees, and hummingbirds. The ripe seeds will attract songbirds. The foliage was used to make tea traditionally. It grows best in well-drained sandy loam or rocky soils in full sun to partial shade. Its deep root system makes it very drought tolerant once established, and good for use in erosion control on slopes. **\$10.00**

2-3' T x 3-5' W

Zones 4-8

Pot Size: 2 qt.

Current Plant Size: 4-6 in.

Cephalanthus occidentalis

Common Buttonbush — is a handsome shrub native to Coastal Virginia, and it is well suited to wet soils. Beneficial native pollinators, honeybees, and hummingbirds are attracted to the flowers, and ducks and other water birds consume the seeds. It has glossy dark green foliage and showy white spring flowers with a very unique structure. The round button-like fruits appear in winter to keep this plant interesting year-round. Sun to partial shade in moist to wet soils. Tolerant of occasional salt flooding, but prefers fresh water.

Cephalanthus occidentalis
'SMCOSS'SUGAR SHACK'

Photo Courtesy of Proven Winners

SUGAR SHACK® Buttonbush — is a downsized version of our Coastal Virginia native that still has those unusual, showy, fragrant white flowers, colorful red fruit, and glossy foliage. The flowers attract hummingbirds, butterflies, bees, and other beneficial pollinators, while the ripe seeds attract songbirds and other wildlife. It prefers full sun to partial shade in moist to wet soil; deer resistant. A fantastic choice for gardeners with problematic soggy soil! **\$20.00**

Chaenomeles speciosa
DOUBLE TAKE® 'Orange Storm'

Proven Winners

DOUBLE TAKE® 'Orange Storm' Flowering Quince — is part of a series that offers pure, rich, saturated color on plants that rarely need pruning or much maintenance at all. Unlike older varieties of flowering quince, they are also thornless, so they're perfect for flower arranging and forcing. Flowering quince are very tolerant of heat and dry conditions. DOUBLE TAKE 'Orange Storm' has double, vibrant orange flowers that will attract a few pollinators. Flowering quince blooms in late winter to early spring, but DOUBLE TAKE® selections may have some rebloom in the summer and fall. Prefers full to partial sun in moist well drained soil, drought tolerant once established.

Chitalpa 'NCX1' EL NINO®

Proven Winners

EL NINO® Desert Orchid — This exciting plant is a very unique intergeneric hybrid between desert willow (*Chilopsis linearis*) and catalpa (*Catalpa* sp.), combining the drought and heat tolerance with showy flowers. Indeed, the fragrant blooms look like clusters of pinky purple orchids and begin blooming in late spring to early summer, continuing sporadically through the growing season. EL NINO® can be treated as a large shrub or a small tree, and it prefers full to partial sun in moist well drained soil; drought tolerant and deer resistant. **\$25.00**

10-15' T x 8-10' W

Zones 6-9

Pot Size: #1

Current Plant Size: 12-15 in.

Clethra alnifolia

Summersweet — is a Coastal Virginia native that attracts butterflies, hummingbirds, and loads of insect pollinators. The glossy dark green leaves set off the pure white flowers in early summer. Later, birds and other wildlife will enjoy the ripe seeds. Plant it near the deck or patio to enjoy the sweet scent. In fall the foliage turns a handsome golden yellow. It will grow in full sun to near near-deep shade; tolerant of wet soil, deer, and some salt. When this species is in full bloom, it becomes the pollinating insect version of Grand Central Station. **\$12.00**

3-8' T x 4-6' W

Zones 3-9

Pot Size: #1

Current Plant Size: 12-15 in.

Clethra alnifolia
'Caleb' VANILLA SPICE®

VANILLA SPICE® Summersweet — is a wonderful cultivar of one of the most beneficial Coastal Virginia natives. It attracts butterflies, hummingbirds, and loads of insect pollinators — a real magnet! The attractive, glossy dark green leaves set off the pure white summer blooms. The flowers of VANILLA SPICE® are larger than other *Clethra* varieties, and they are wonderfully fragrant as well! Birds will enjoy the ripe seeds. The foliage turns an attractive golden yellow in fall. Plant it near the deck or patio to enjoy the sweet scent in early summer. Tolerant of full sun to near-deep shade in moist to wet soils, deer resistant and salt tolerant. **\$20.00**

3-6' T&W

Zones 4-9

Pot Size: #1

Current Plant Size: 6 in.+

Clethra alnifolia
'Crystalina' SUGARTINA®

Proven Winners

SUGARTINA® Summersweet — is a dwarf cultivar of one of the most beneficial Coastal Virginia natives – perfect for smaller spaces. It attracts butterflies, hummingbirds, and loads of insect pollinators. The attractive, glossy dark green leaves set off the pure white summer blooms, and like other summersweet, the flowers of SUGARTINA® are wonderfully fragrant. Birds will enjoy the ripe seeds. The foliage turns an attractive golden yellow in fall. Plant it near the deck or patio to enjoy the sweet scent in early summer. Tolerant of full sun to near-deep shade in moist to wet soils, deer resistant and salt tolerant. **\$20.00**

TOLERATES WET SOIL

Cotinus coggyria 'MINCOJAU3'
WINECRAFT GOLD®

Photo Courtesy of Proven Winners

WINECRAFT GOLD® Smokebush — offers several seasons of interest. The new foliage emerges in spring with a handsome orange color, turning to gold, and eventually maturing to chartreuse. The ivory white flowers bloom in summer and age to pink, all the while resembling a puff of smoke. Butterflies appreciate the flowers. This particularly selection also has a more compact habit than the species, making it well suited to smaller gardens. The plant prefers full to part sun in moist well drained soil. Once established, it is deer and drought resistant. **\$20.00**

4-6' T&W

Zones 5-8

Pot Size: #1

Current Plant Size: 16-18 in.

Cotinus coggyria 'NCCO1'
WINECRAFT BLACK®

Photo Courtesy of Proven Winners

WINECRAFT BLACK® Smokebush — is a smaller scale smokebush, offering plenty of color over a long season. The deciduous foliage emerges a deep purple in spring, changing to near-black in the heat of summer, then blaze orange and red in fall. The smoke-like, red-pink flower panicles that give this shrub its nickname arrive in early summer attracting butterflies. Requires full sun in moist well drained soil, deer and drought resistant. **\$20.00**

Pot Size: #1

Current Plant Size: 6 in. x 10 in.

Forsythia x intermedia 'Mindor'
SHOW OFF®

© Proven Winners® ColorChoice®

SHOW OFF® Forsythia — is an improvement on old fashioned forsythia. It has increased flower power with blossoms covering each bare stem from the ground to top in late winter. It makes a great cut flower, and it can also be harvested early to force blooms indoors. It prefers full to partial sun in moist well drained soil; deer resistant. **\$20.00**

5-6' T&W

Zones 5-8

Pot Size: #1

Current Plant Size: 15-18 in.

Hibiscus mutabilis

Cotton Rose (a.k.a. Confederate Rose) — is indeed related to cotton and other members of the hibiscus family, but is a rose in resemblance only. A large shrub or small tree, in late summer the 3-6" wide, usually double blooms open white and age to dark pink giving the entire plant a multi-colored effect. Hummingbirds, butterflies, and bees will be attracted to the flowers. It needs full sun in moist soil; tolerant of occasionally we soil. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

10-12' T x 8-10' W

Zones 7-9

Hydrangea paniculata 'SMHPPH'
LIMELIGHT PRIME®

LIMELIGHT PRIME® Panicle Hydrangea — is an improved, more refined version of 'Limelight' with darker, healthier-looking foliage, stronger stems, and a more compact growth habit. The blooms emerge a vivid lime green and maintain that color longer, eventually transitioning to pink as the flowers age. Like other panicle hydrangeas, this one blooms in mid-summer and the flowers will attract pollinators. Panicle hydrangeas prefer full sun to partial shade, moist well drained soil; salt tolerant. This selection can nearly be considered local, as it was developed at NCSU – go pack!. **\$25.00**

4-6' T x 4-5' W

Zones 3-8

Pot Size: #1

Current Plant Size: 6-8 in. x 6-8 in.

Hydrangea paniculata 'SMNHPK'
FIRE LIGHT TIDBIT®

FIRE LIGHT TIDBIT® Panicle Hydrangea — is a great choice for gardeners with only a little space to work with. On a very dwarf plant, the blooms emerge lime green, then age to white, and finally take on pink tones. Bonus – this is one of the few panicle hydrangea varieties with decent fall foliage color, turning yellow and orange. Like other panicle hydrangeas, this one blooms in mid-summer and the flowers will attract pollinators. Panicle hydrangeas prefer full sun to partial shade, moist well drained soil; salt tolerant. **\$25.00**

2-3' T x 3' W

Itea virginica 'Henry's Garnet'

Henry's Garnet Virginia Sweetspire — is a favorite cultivar of the Coastal Virginia native *Itea*. Its fragrant white flowers are typically larger than the species, but like the species, it blooms from late spring to early summer attracting hummingbirds, butterflies, and other pollinators. Plus, the ripe seeds attract songbirds and other wildlife. 'Henry's Garnet' typically has more colorful fall foliage than the species turning outstanding shades of orange, scarlet and deep purple lasting into early winter. All *Itea* are very adaptable, being able to grow in sun or shade, in wet or dry soil, plus they are deer resistant. They truly are one of our best native shrubs! **\$30.00**

3-4' T x 4-6' W

Zones 5-9

Pot Size: #3

Current Plant Size: 3 ft.

Itea virginica 'SMNIVDFC' SCENTLANDIA®

Proven Winners

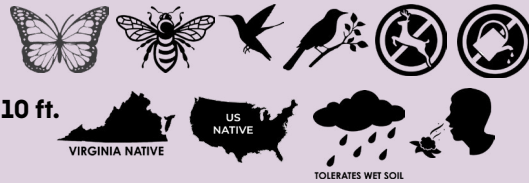

SCENTLANDIA® Virginia Sweetspire — A Coastal Virginia native cultivar, SCENTLANDIA™ is draped in stunning panicles of fragrant white flowers at the ends of the branches in early summer. The flowers attract hummingbirds, butterflies, and other pollinators, and the ripe seeds attract songbirds and other wildlife. Virginia sweetspire has green foliage throughout the summer, then it turns outstanding shades of orange, scarlet and deep purple in the fall lasting into early winter. Great for borders or as a foundation. SCENTLANDIA is the most fragrant variety, and it also has a more compact dense habit, only reaching 2-3' tall and wide. Will grow in full sun to partial shade, but is tolerant of more shade; does best in moist soil, but is tolerant of wet soils or drought once established; deer resistant. **\$20.00**

Itea virginica 'SMNIVMM' FIZZY MIZZY®

Proven Winners

FIZZY MIZZY® Virginia Sweetspire — is a newer cultivar of the Coastal Virginia *Itea*, and like other varieties, it has fragrant white flowers from late spring to early summer which attract hummingbirds, butterflies, and other pollinators. Plus, the ripe seeds attract songbirds and other wildlife. The foliage turns outstanding shades of orange, scarlet and deep purple in the fall lasting into early winter. What sets FIZZY MIZZY® apart are its more upright flowers and tidy uniformed habit. All *Itea* are very adaptable, being able to grow in sun or shade, in wet or dry soil, plus they are deer resistant. They truly are one of our best native shrubs! **\$20.00**

Melianthus major

Honeybush — is native to South Africa and it will bring big bold architecture to your garden. The chalky blue leaves are large, divided, and look as if they were cut with pinking shears. On top of that, they smell of peanut butter. In mild winters it will tend to be semi-evergreen, and will produce sweetly scented burgundy flowers, but this plant is grown more for its foliage. In cold winters it can die to the ground behaving more like a perennial than a shrub. In severe winters it may be lost outright, but a thick layer of mulch applied in the fall will give it better odds. It prefers full to part sun in consistently moist soil; deer and salt resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

4-6' T x 3-6' W (or more)

Zones 8b-11

Pot Size: #1

Current Plant Size: 8-12 in.

Prunus x cistena

Purpleleaf Sand Cherry — is covered in small pinkish-white blooms in early spring, which will later produce small cherries that birds will relish. However, the real star of the show is this plant's burgundy-red foliage that covers it from late April until the first freeze. Prefers full to partial sun in moist well drained soil. Drought tolerant once established. **\$45.00**

7-10' T x 5-8' W

Zones 2-8

Pot Size: #5

Current Plant Size: 2-3 ft.

Rhus typhina 'Bailtiger' TIGER EYES®

Tiger Eyes® Staghorn Sumac — is an unusual, handsome, gold-leafed, dwarf version of the reliable staghorn sumac, a Virginia native. The finely cut foliage and red tinted stems add rich texture and touch of color all season long. Flowers appear in late spring with male and female flowers on different plants. Both produce tall panicles of tiny yellow flowers. The female flowers attract insect pollinators and develop into a cluster of bright red fruits that attracts other wildlife, especially birds. Foliage turns vibrant shades of yellow, orange and red in the fall. It prefers full sun to partial shade in moist well drained soil; drought resistant. More shrub than tree, it only grows 3-6' T&W, but it has a spreading habit. **\$40.00**

3-6' T&W

Zones 4-8

Roses

For the first time, we are excited to offer several of the Garden's own roses. These were grown by our greenhouse and nursery staff and started as cuttings from our collection. As is typical of most roses, these all prefer full sun in moist soil, high in organic matter, and they need to have good drainage. Once established, however, they can be pretty forgiving

Lady Banks Rose — This rose is an extremely vigorous, large climber with masses of $\frac{3}{4}$ " double yellow blossoms in mid-spring, in fact, it is the earliest of our roses to bloom. It is further distinguished by being thornless and occasionally evergreen in mild winters. Due to its vigor and large size, it needs a very sturdy trellis or arbor on which to climb. **\$25.00**

Ruta corsica

Corsican Rue — This fragrant Mediterranean plant has a storied past and has been used both by the Catholic Church as well as in Pagan cultures. It has an unusual zigzag pattern to its branching, above near evergreen silvery foliage. In summer, clusters of white flowers appear. Although often listed as a culinary herb, there are better (and safer) plants for the kitchen. Like other rue, this one can cause contact dermatitis in some people. While it may look more like a perennial, it is indeed a shrub. It needs full sun in very well drained soil; deer resistant, drought and heat tolerant. **\$12.00**

Lindera benzoin

Sweet Azalea (a.k.a. Sweet Azalea) — is a Virginia native (Piedmont and mountains) with fragrant late spring flowers that are typically white to pale pink with prominent bright red stamens. The flowers attract insect pollinators and hummingbirds. The deciduous foliage has attractive fall color before dropping for the season. This species tends to spread by layering in and rooting as it goes. It prefers partial shade to filtered sun in consistently moist, well drained soil; tolerant of brief wet periods. **\$35.00**

Amsonia 'Blue Ice'

JCRA

'Blue Ice' Amsonia (a.k.a. Blue Star) — is a naturally occurring native hybrid with a shorter, more compact habit and deeper lavender blue flowers above glossy willow leaves. It is very floriferous attracting a variety of pollinators, and in the fall the foliage of 'Blue Ice' will turn a warm golden yellow. Its habit, flowering, and fall color make it a perfect element for the landscape. Very impressive in a mass planting. Low care, deer and rabbit resistant, it prefers full to partial sun in moist well drained soil. **\$12.00**

12-15" T x 8-24" W

Zones 4-9

Pot Size: #1

Amsonia hubrichtii

Arkansas Blue Star — is an American native perennial that sports clusters of small, star-shaped light blue flowers above fern-like foliage in late spring. This tall clumping grower has a rugged constitution, tolerating full sun to partial shade, and once established, it is considerably drought tolerant and deer resistant. After blooming, the finely textured foliage remains light green all summer, finally turning a stunning golden yellow in the fall. In fact, it is one of the best-known perennials for fall foliage color, and it contrasts well with fall blooming asters. It needs well drained soil. In 2011, Arkansas blue star was named the Perennial Plant of the Year™ by the Perennial Plant Association.

Dyschoriste oblongifolia

Sharpj99

Twin Flower — is a hard-to-find plant, native from Georgia and Florida (though some sources list it in Virginia as well). Its beautiful lavender flowers attract many pollinators, and it is a host plant for common buckeye butterflies. Its spreading habit and ease of growth make it an excellent groundcover. It prefers full to partial sun in moist well drained soil, and it does show a degree of tolerance for drought. **\$12.00**

Echinacea 'Cheyenne Spirit'

Walters Gardens, Inc.

'Cheyenne spirit' Purple Coneflower — is a vigorous seed grown mix of the North American native purple coneflower. The flowers come in a range of colors and they can either be the typical pink, but also tomato-red, golden yellow, vibrant orange, or white. Like other coneflowers, the blooms will attract butterflies and other insect pollinators. The flowers begin in late spring and last into early fall if deadheaded. However, late in the season, leave the seedheads for birds to enjoy. It prefers full to part sun in moist well drained soil. Once established, it can survive the occasional drought; deer resistant. **\$12.00**

22-30" T x 18-28" W

Pot Size: #1

Echinacea paradoxa

Yellow Coneflower— Native from Missouri south to Texas, this perennial is well adapted to hot dry conditions with the help of its deep roots. Unfortunately, it is considered threatened in part of that range. Bright yellow flowers surrounding a central cone bloom in early summer attracting a number of butterflies and other pollinators. Later, the ripe seeds will attract birds. Full to part sun in moist well drained soil; drought and deer tolerant. In rich soil with abundant moisture, it may need staking. **\$12.00**

Echinacea purpurea 'Magnus'

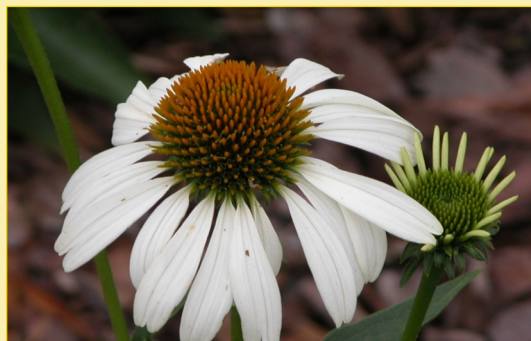

'Magnus' Purple Coneflower — is an older variety of the North American native purple coneflower, but it is one of the best, a time-tested, superior cultivar. It has tall upright stems topped with attractive cones surrounded by broad spreading pink petals. Like other coneflowers, the blooms will attract butterflies and other insect pollinators. The flowers begin in late spring and last into early fall if deadheaded. However, late in the season, leave the seedheads for birds to enjoy. It prefers full to part sun in moist well drained soil. Once established, it can survive the occasional drought; deer resistant.

Eryngium aquaticum

Marsh Rattlesnake Master — is a Coastal Virginia native that grows naturally in bogs, marshes, and other wet areas. It can also grow in normal garden soil as long as it is kept moist, but once established can also take the occasional drought. The handsome foliage and flowers are great in cut and dried arrangements. The white flowers have a blue or purple tinge and bloom summer through fall, naturalizing easily through seed. The flowers are very attractive to butterflies, other insect pollinators, and birds. Marsh rattlesnake master prefers full to partial sun; deer resistant. **\$12.00**

Iris pseudodata

We are excited to offer 3 different cultivars of this unusual cross between *Iris pseudacorus* (Yellow Flag Iris) and *Iris ensata* (Japanese Iris). Those that are “woke” to the invasive nature of *I. pseudacorus* need not to worry if this new cross will take over, the flowers are sterile. However, they do provide a good amount of nectar making them popular with hummingbirds and insect pollinators. They prefer full to part sun in moist to wet soil, and would be right at home in pondside or bog plantings, but normal soil is fine too, as long as they do not dry out. Deer and rabbit resistant.

'Shiryukyo' ('Purple Dragon's Valley') — is a midseason to late season bloomer produces reddish purple standards with a deep purple marking that outlines the bright yellow signal above dark green foliage. **\$15.00**

45-54" T x 48" W

Zones 4-9

Pot Size: #1

'Tsukiyono' ('Moonlit Field') — has soft lavender petals with a dark violet pattern around the yellow signal, radiating to the petal edge. This is a midseason bloomer and will be at peak in early summer. **\$15.00**

40-44" T x 36-48" W

Zones 4-9

Pot Size: #1

'Yarai' ('Night Thunder') —blooms a bit earlier than the others and has a unique peach blend flowers that have deep purple veining. The standards have more deep purple coloring, and it has a prominent yellow signal. **\$15.00**

Kosteletzkya virginica

Seashore mallow — is a salt tolerant Coastal Virginia native. A wetland plant, it grows naturally in brackish marshes and freshwater wetlands. However, it is commonly grown very successfully in average garden soil as long as it is not allowed to totally dry out. Seashore mallow is late to emerge in spring but it attains full size by July when many small (2-3"), delicate, hibiscus-like flowers begin to appear, from pale to deep pink. Flowers last one day, but there are many of them, and the blooming period is long, continuing into fall. Seashore mallow was the Virginia Wildflower of the Year in 2004. Prefers full sun in moist to wet soil; attracts hummingbirds, butterflies, and other pollinators. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

3-4' T x 2-3' W
Zones 6-9

Oenothera fruticosa

Sundrops — are upright, clump-forming perennials boasting showy clusters of bright yellow flowers. This Coastal Virginia native blooms from late spring to early summer, rising from reddish-purple rosettes. Attractive to hummingbirds, songbirds, butterflies, and other pollinators. Prefers full to partial sun in moist well drained lean soil; drought, heat, salt, and deer tolerant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

Pot Size: #1

Oenothera fruticosa 'Fireworks'

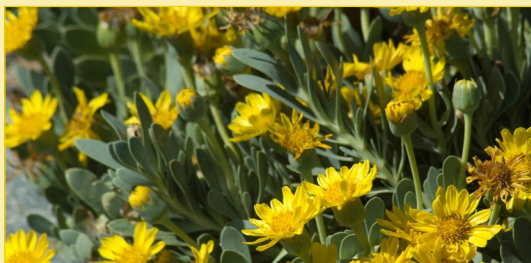

Northcreek Nurseries

'Fireworks' Sundrops — is a colorful cultivar of a Coastal Virginia native perennial. Bright canary yellow blooms open in early summer from red buds. The flowers attract a wide variety of insect pollinators, and hummingbirds will occasionally visit as well. While each bloom only lasts one day, they bloom consecutively. The red stems and bronze foliage of this cultivar are more colorful than the species. The basal foliage never disappears entirely in winter and takes on additional red tones to add interest in the off-season. Prefers full to light sun in moist well drained soil; drought, deer, and salt tolerant. **\$12.00**

Penstemon digitalis

Foxglove Beardtongue — is an elegant, native, perennial wildflower that forms upright clumps. This beardtongue has deep green leaves on strong upright stems. In late spring to early summer, plants are topped by showy panicles of tubular snapdragon-like white flowers. Hummingbirds, butterflies, and other insect pollinators are attracted to the flowers, and birds will eat the seeds. Prefers full to partial sun in moist, but well drained soil; drought and deer tolerant. **\$12.00**

Penstemon 'Prairie Dusk'

Walters Gardens, Inc.

'Prairie Dusk' Beardtongue — is a hybrid selection of the widespread native *Penstemon*. The early summer flowers are a much more intense pink-purple color than other species and cultivars. Flower arrangers should plant several, one for themselves to cut and bring indoors, and a few for the hummingbirds and bees who will flock to the flower spikes covered in blooms. Prefers full sun in moist well drained soil; drought, salt, and deer tolerant. **\$12.00**

Phlox 'Fashionably Early Crystal'

Walters Gardens, Inc.

'Fashionably Early Crystal' Hybrid Phlox — is part of a series with North American native parentage whose selections bloom earlier than typical garden phlox (*Phlox paniculata*) as well as having a more spreading habit. They also have exceptional mildew resistance and thick leathery leaves. 'Fashionably Early Crystal' is a taller selection with pure white flowers with a faint light purple eye that appear from early summer well into midsummer with some rebloom in fall. The flowers are fragrant and attract butterflies, bees, and hummingbirds. They prefer full to partial sun in moist well drained soil. **\$12.00**

Phlox glaberrima 'Morris Berd'

New Moon Nursery LLC

'Morris Berd' Smooth Phlox — is not your typical phlox. It is native to the Midwest and the Southeast, including parts of Virginia. In our climate it is a semi-evergreen groundcover whose dark green foliage turns maroon in cold weather. In late spring to early summer, it is covered with showy clusters of pink flowers that attract hummingbirds, butterflies, and other insect pollinators. It is rated as one of the most mildew resistant varieties and one of the best garden performers. It prefers full sun to light shade in moist well drained soil, but can take short periods of drought; deer resistant. **\$12.00**

Ornamental Grasses

River Oats — Native to Coastal Virginia, and beyond, this ornamental grass is one of the few that grow well in shadier gardens. In late summer the seed head begin to form and resemble oats, and when wind catches them, the plants will sway adding movement to the garden. Fall will find the foliage turning shades of yellow and brown. Several species of butterfly use river oats as a host plant, and pollinators, birds, and small mammals will also find this plant attractive. Dappled sunlight to partial shade is best in moist to wet soil; deer and salt resistant. If happy it can spread vigorously! *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

Schizachyrium scoparium 'Chameleon'

Peonies

Peonies are an old-fashioned favorite whose large, often fragrant, late-spring flowers are quite showy, and cherished by flower arrangers. They can sometimes be tricky to grow in the South, so gardeners need to give them what they want – full sun and rich, moist, well drained soil. Herbaceous peonies (those that die to the ground every year) tend to begin dormancy in late summer, earlier than most perennials, so don't worry if yours look rough by August. Tree peonies maintain above-ground stems all year, even after the foliage drops. All peonies are typically deer resistant, but deer don't always read plant labels.

Paeonia 'Bartzella'

Walters Gardens, Inc.

'Bartzella' Peony — is an intersectional hybrid that is a much-prized peony is a cross between tree and herbaceous selections. It has numerous, gorgeous, double to semi-double yellow flowers in spring on an upright shrub-like plant. **\$50.00**

Phlox subulata 'Emerald Blue'

'Emerald Blue' Creeping Phlox — is a popular evergreen perennial with masses of pale, lavender blue flowers that blanket dark green foliage in early to mid-spring. This old-fashioned favorite is a native and is an excellent choice for rock gardens, or to use as a groundcover. It also does well when draping over a rock wall. Butterflies love them, and they are also deer, drought, and salt tolerant. Plant in full sun with moist well drained soil; drought tolerant once established. **\$12.00**

4-6" T x 12-24" W

Zones 3-9

Pot Size: #1

Phlox subulata 'Red Wing'

Walters Gardens, Inc.

'Red Wing' Creeping Phlox — is a cultivar of an old-fashioned, reliable garden favorite that is native to North America including central and western Virginia. It has evergreen foliage and a groundcover-like habit. 'Red Wings' has bright pink flowers with red eyes that cover the plant in spring, attracting butterflies and other insect pollinators. It does best in full sun with moist well drained soil, but once established it is quite drought tolerant. It also tolerates deer, rabbits, heat, humidity, and salt, but not shade or continually wet soil. **\$8.00**

Pot Size: #1

Sisyrinchium angustifolium

Blue-eyed Grass — despite its common name, is not a grass at all, but actually a member of the Iris family, and it is native to all parts of Virginia. It has purply blue, star shaped flowers with gold centers that rise above fine, semi-evergreen, grass-like foliage from May to June. The flowers are very attractive to a number of insect pollinators, and songbirds appreciate the ripe seeds. Prefers full sun to partial shade in moist well drained soil; drought tolerant and deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

10-12" T x 6-12" W

Zones 5-9

Pot Size: 2 qt.

Sisyrinchium angustifolium 'Lucerne'

Walters Gardens, Inc.

'Lucerne' Blue-eyed Grass — differs from the straight species in that it produces more abundant flowers. Despite its common name, is not a grass at all, but actually a member of the Iris family, and it is native to all parts of Virginia. It has purply blue, star shaped flowers with gold centers that rise above fine, semi-evergreen, grass-like foliage from May to June. The flowers are very attractive to a number of insect pollinators, and songbirds appreciate the ripe seeds. Prefers full sun to partial shade in moist well drained soil; drought tolerant and deer resistant. **\$10.00**

Solidago rigida ssp. humilis
'Golden Rockets'

New Moon Nursery

'Golden Rockets' Stiff Goldenrod — is a compact cultivar of *Solidago*, one of our most widespread and beneficial native genera. In late summer, rounded heads of golden yellow flowers begin blooming attracting numerous pollinating insects. Later, birds will enjoy eating the seeds. This species prefers full sun in moist well drained soil, but it is drought tolerant once established. It also highly tolerant of salt, so a good choice for coastal landscapes. **\$12.00**

2' T&W

Zones 3-9

Pot Size: #1

Stachys byzantina 'Helene Von Stein'

'Helene Von Stein' Lamb's Ear — is a superior selection of the much-loved cottage garden perennial. It is sometimes listed and sold as 'Big Ears'. It is noted for its large velvety soft, silver leaves that are up to 8" long; it makes an excellent groundcover. Though it is grown primarily for the foliage, it will flower with small pink to purple blooms. It prefers full to partial sun and it must have excellent drainage; drought tolerant. **\$12.00**

10-12" T x 12-15" W

Zones 4-9

Pot Size: #1

Stachys monieri 'Hummelo'

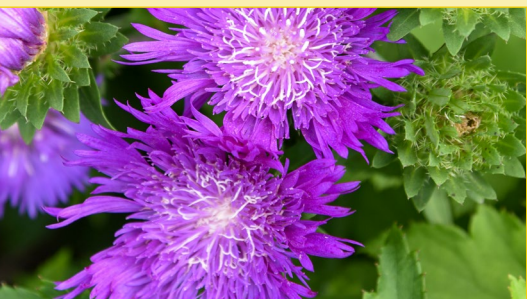

North Creek Nurseries

'Hummelo' Betony — bears numerous spikes of small bright violet-purple flowers above compact healthy clumps of oblong, wrinkled, mid-green leaves that are often evergreen. The knee-high flower spikes are showier and somewhat more compact than those of most other forms of common betony. The flowers attract bees, hummingbirds, and butterflies. In time the plant will spread politely to form a colorful groundcover. Prefers full to partial sun in moist well drained soil; drought tolerant once established and deer resistant. **\$10.00**

Symphyotrichum georgianum

photo by Biosthmors, unaltered

Georgia Aster — is a lovely and rare Southeastern native perennial with violet-purple, fall blooms - some of the most intensely colored of any American aster. Like its cousins, this plant is very attractive to butterflies and other insect pollinators. Songbirds will appreciate the ripened seeds. Threatened in the wild due to habitat loss and fire suppression, you can help this plant survive by planting it in your own garden. Prefers full sun in moist well drained soil; drought tolerant once established. **\$12.00**

Tulbaghia violacea

Society Garlic— is a perennial from South Africa, and gardeners may have trouble finding a perennial that blooms for as long as it blooms. Beginning late spring and going until the first freeze, clusters of lilac pink flowers continuously bloom. The flowers are edible and can be used fresh in salads. The grass-like foliage smells like garlic which is great if you like garlic. If you don't, beware that aroma intensifies with the first cold weather. Easy to grow, this South African, clump forming perennial can take full sun, heat, humidity, drought, salt, and deer. Plant a piece of NBG in your own garden - this offering comes from our collection. **\$12.00**

12-18" T x 12" W

Zones 7b-10

Pot Size: #1

Verbena stricta

Hoary Vervain — is a North American native that is found naturally in much of the mid-west. It is clump forming perennial that spreads easily from seed, and a great choice for sunny, dry gardens. Butterflies and other insect pollinators are attracted to its tall spikes of purple-blue flowers that bloom in summer. Birds and other wildlife will enjoy the seeds. It prefers full sun in well drained soil, avoid soggy soil; drought tolerant. **\$10.00**

2-4' T x 1.5-2' W

Zones 4-8

Pot Size: 2 qt.

Verbena tenuisecta

Moss Verbena — is low growing perennial that will carpet your garden with ferny green foliage and blooming mat of flowers from late spring through summer that attract butterflies and other insect pollinators. In its native South America, the flowers can be pink, white, or purple, but we have selected this one for its rich purple blooms. It does best in full sun, but can also take light shade, though it will not have as many blooms there. It also needs moist well drained soil, but once established it can take the occasional drought. Very heat and humidity tolerant. Plant a piece of NBG in your own garden - this offering comes from our collection. **\$6.00**

1-1.5' T x 3-6' W

Zones 6-12

Pot Size: 1 qt.

Vernonia lettermanii 'Iron Butterfly'

North Creek Nurseries

'Iron Butterfly' Ironweed — is a cultivar of a rare Arkansas native known for its more compact size, dense mounded habit, and numerous showy purple flowers. The summer blooms are long lasting and very attractive to butterflies and other insect pollinators, as well as hummingbirds. The finely textured foliage is thread-like and attractive all season. It prefers full to partial sun in moist well drained soil, however it is drought tolerant once established, and it can even take the occasional inundation, but resents constantly wet soil. Some of you of a certain age now likely have the song "In-A-Gadda-Da-Vida" rolling around your heads. **\$12.00**

2-3' T x 1.5-2' W

'Ogon' Sweetflag — is a low-growing grass-like groundcover that has bright golden yellow, evergreen foliage. The crushed or bruised foliage has a pleasant sent, hence its common name. It makes a great plant to edge shady borders with, or planted in mass as a groundcover, but it is also makes a stunning addition to summer or winter containers. It grows best in consistently moist to wet soil and prefers partial to full shade, but it can also tolerate some morning sun. Long-lived and easy to grow, it will spread politely. **\$10.00**

6-12" T x 12-24" W

Zones 4-9

Pot Size: #1

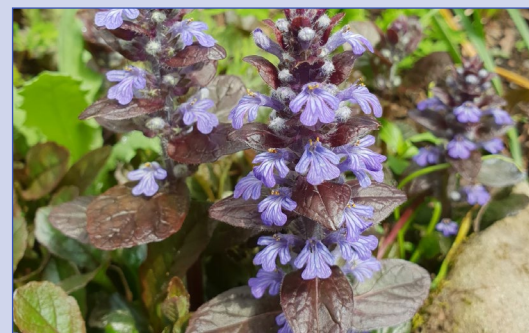

Acorus greamineus 'Ogon'

Bronze Bugleweed — is an attractive groundcover with glossy, bronzy purple to green, scalloped leaves and a dense habit. From mid to late spring, short spikes of violet-blue flowers stand upright above the very low, spreading foliage. The flowers attract butterflies, bees, and other pollinators. This evergreen groundcover can grow in the shade of large trees where grass is hard to establish. Given adequate moisture, this plant will grow in full sun, but partial shade is probably more suitable. It needs moist well drained soil. If happy, this plant can spread vigorously. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$5.00**

Ajuga reptans 'Atropurpurea'

Frilly Knickers™ Hybrid Japanese Anemone — If you guessed a plant with a name like this had to come from an English gardener, then you would be right. In late summer, 24" tall, dark flower spikes arise above the handsome foliage. When the blooms open they are double to semi-double and the front of the petal is white, but the reverse has a pale lavender tone. In Southern gardens, Japanese anemones prefer light shade and moist well drained soil. They make a good cut flower, and they are resistant to deer and rabbits, and they are mildly salt tolerant. **\$12.00**

18-20" T x 18" W

Zone 5-9

Pot Size: #1

Anemone 'FP007' Frilly Knickers™

Eastern Red Columbine — is a Coastal Virginia native and a wonderful addition to native plant gardens, woodland gardens, cottage gardens or naturalized areas. Freely self-seeds and will naturalize to form large colonies in optimum growing conditions. Unusual orange and yellow late spring flowers attract hummingbirds, bees, butterflies, and other pollinators, and the seeds will attract birds. While the flower stalks may get tall, the handsome, lacy, fern-like foliage stays lower. Prefers partial shade and moist well drained soil; deer resistant. Truly one of our best native wildflowers! *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

'Lynnhaven Carpet' Robin's Plantain — is an outstanding Coastal Virginia native that was first found in a Virginia Beach garden and named for the Lynnhaven River. Beautiful light lavender flowers rise above its relatively large silvery green foliage, which forms a dense, semi-evergreen mat. This is a favorite perennial with NBG staff, mainly for its astonishing ability to thrive in a wide range of challenging conditions. Butterflies and other pollinators will appreciate it as well. 'Lynnhaven Carpet' will grow in sun or shade, but the more sun it gets the more water it needs, happiest in light sun to partial shade. The soil should be moist and well drained, drought tolerant, deer resistant, and pollinator friendly. It also makes a long-lasting cut flower. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

'Pine Knot Select' Lenten Rose — is a strain first developed at the famed Virginia hellebore nursery, Pine Knot Farms. The group offers a wide array of colors (pinks, whites, burgundies, to nearly black) on superior plants that add life to the winter garden. Like other Oriental hybrids, these plants feature evergreen foliage on plants that are well suited for shady gardens, and are they virtually insect and disease free. They prefer partial to full shade in moist well drained soil. Once established they are drought tolerant, deer and rabbit resistant, and if happy they will seed around. Plant of piece of NBG in your own garden, this offering comes from our collections. **\$15.00**

1-1.5' T&W

Zones 4-9

Pot Size: #1

'Caramel' Coral Bells — is grown primarily for its evergreen, wavy, richly colored, amber to apricot colored foliage, whose undersides are a purple-red. In spring, flower spikes daintily rise well above the foliage and have ivory white, bell shaped flowers that insect pollinators and hummingbirds find attractive. We have found this selection to be more vigorous than others, well suited to containers or in garden beds as long as it gets partial shade in the summer, and it is critical that it has good drainage. Moderately deer resistant. **\$15.00**

'Electric Plum' Coral Bells — The new leaves emerge near black and lighten to an intense purple with dramatic black veining. Dainty, bright fuchsia pink flowers are produced on near black stems, and the blooms attract insect pollinators and hummingbirds. The plant will do well in containers or in garden beds as long as it gets partial shade in the summer, and it is critical that it has good drainage. Being a *Villosa* hybrid, it is better adapted to Southern heat and humidity than other selections; moderate salt tolerance. **\$12.00**

8-10" T x 16-18" W

Zones 4-9

Pot Size: 2 qt.

***Heuchera* 'Electric Plum'**

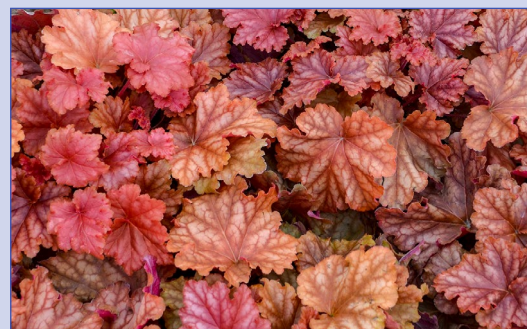

Walters Gardens, Inc.

'Peachberry Ice' Coral Bells — Looking to brighten your shade garden with a touch of bright orange? Then this selection will do. Large 4½-5", apricot orange ruffled leaves have a silver overlay. The bright orange color is most pronounced in the spring with newly emerging foliage, over the warmer months the color mellows. Burgundy stems hold airy, cream flowers that attract insect pollinators and hummingbirds. The plant will do well in containers or in garden beds as long as it gets partial shade in the summer, and it is critical that it has good drainage; moderately salt tolerant. **\$15.00**

8-10" T x 30-34" W

Zones 4-9

Pot Size: #1

***Heuchera* 'Peachberry Ice' PRIMO®**

Walters Gardens, Inc.

'Smoke and Mirrors' Coral Bells — has unusual, evergreen, gray foliage with dark gray veining, all with a rosy blush. Heuchera make attractive container plants, and actually prefer the good drainage potting soil usually offers. In late spring to early summer, wispy flower spikes rise tall above the foliage and hold small rosy flowers. The foliage color will make a good foil when mixed with bright fuchsia or violet flowers. It will do best in bright shade with evenly moist soil. Though not drought tolerant, it does not want to be soggy either. 'Smoke and Mirrors' has proven it tolerates Southern heat and humidity better than other selections, and it is mildly salt tolerant. **\$12.00**

8-10" T x 14-16" W

Zones 4-9

Pot Size: 2 qt.

***Heuchera* 'Smoke and Mirrors'**

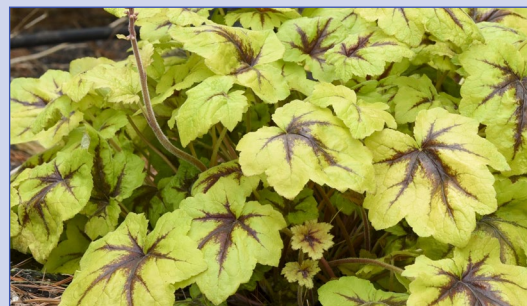

Walters Gardens, Inc.

'Catching Fire' Heucherella — (a.k.a. Foamy Bells) is a hybrid of two North American natives, *Tiarella* and *Heuchera*. It is noted for its brightly colored foliage with vibrant evergreen lime-green leaves with rounded edges. Crimson, flame-shaped markings streak from the center of the leaves, deepening to mahogany in summer. Its flowers bloom in late spring with shades of white, attracting to bees. It will do best in partial shade in moist well drained soil. **\$12.00**

8-10" T x 16-20" W

Zones 4-9

Pot Size: 2 qt.

***x Heucherella* 'Catching Fire'**

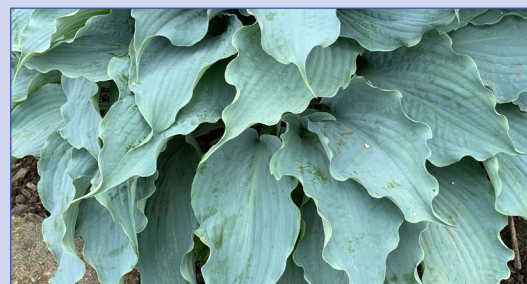

Walters Gardens, Inc.

'Dancing with Dragons' Hosta — Heart-shaped leaves have margins that are heavily rippled and give the hosta an overall wavy appearance. As an added bonus, 'Dancing with Dragons' holds its beautiful blue color throughout the season. Near white flowers top the habit in late summer attracting hummingbirds. Prefers partial to full shade in moist well drained soil. **\$15.00**

Cardinal Flower — is one of our best-known Coastal Virginia native wildflowers. It adapts well to moist garden conditions, especially in areas beside ponds or water features. It forms an upright mound of green foliage, bearing taller spikes of scarlet-red flowers in mid to late summer, attracting both hummingbirds and butterflies. Not usually long lived, but it will self-seed where happy. Partial sun in moist to wet soil. **\$10.00**

4' T&W

Zones 3-9

Pot Size: #1

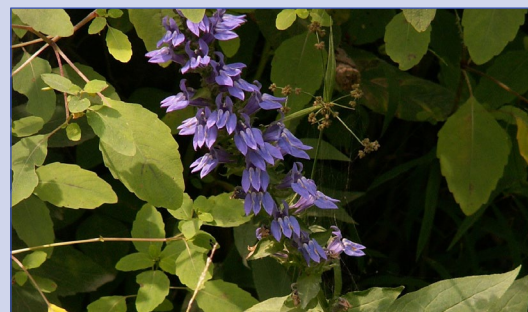

Lobelia cardinalis

Great Blue Lobelia — is a Coastal Virginia native that quickly forms attractive colonies in woodland areas or other shady spots. Its sky-blue, midsummer flowers open in the axils of each upper leaf, and continue to bloom for weeks and weeks. It also produces side shoots, resulting in striking blue blooms on a candelabra-like plant attracting butterflies, other insect pollinators, and hummingbirds. It does best in partial shade with moist well drained soil, but can take more sun if the soil stays moist; deer and rabbit resistant. **\$10.00**

2-3' T x 1' W

Zones 4-9

Pot Size: #1

Lobelia siphilitica

Sensitive Fern — is a large bright green, deciduous fern that is native to North America including Coastal Virginia. It will add a lush texture to the woodland garden. Prefers partial shade in moist to wet soil; it is not tolerant of drought but is deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

1-2' T x 2-3' W

Zones 2-10

Pot Size: 2 qt.

Onoclea sensibilis

Royal Fern — is truly one of the most distinctive and spectacular bold-textured ferns. Native to Coastal Virginia, its light green, leathery leaves will give graceful architectural stature to the shady garden. Although the foliage is deciduous, it does turn a handsome golden yellow in the fall. With adequate moisture, royal fern can reach 6' tall and create a lush, tropical feel along a stream or beside a pond. Needs moist to wet soil in partial to full shade; deer resistant. **\$10.00**

2-3' T&W (or more)

Zones 3-9

Pot Size: 2 qt.

Osmunda regalis

Cinnamon Fern — This Coastal Virginia native fern thrives in shady, moist areas. In spring the emerging fiddleheads will add drama to the garden. The summer foliage is a rich green and turns a golden yellow before dying down in the fall. It needs full to part shade in moist to wet soil, do not let it go dry; deer resistant. **\$8.00**

Aloe cooperi

Grass Aloe — Although we are selling this South African icon as a tropical, with the right conditions it has proven hardy here at NBG. It must have soil with exceptional drainage and full sun, and given that, you will be rewarded with exotic foliage and showy coral-pink and green flowers. Planted outdoors, it goes dormant in the winter. It can also be grown as a houseplant, just give it a sunny windowsill and allow the soil to dry completely between waterings. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

15" T&W

Zones 7b-9b

Pot Size: #1

Dianthus Ideal™ Violet

Ideal™ Violet Dianthus — is a hybrid cross between a Chinese species and the old-fashioned sweet William. It is typically an annual bred for being able to withstand cold weather and the beginning and end of the season, as well as being able to withstand a long hot summer. However, it could be left in the ground at the end of the season for perhaps a second year. It has a very low rounded habit of dense blue-green foliage with two-toned, deep magenta, 1.5", fragrant flowers that bloom from late spring into summer. Prefers full sun in very well drained soil; drought tolerant once established. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

Nepenthes sanguinea

Pitcher Plant — If you like unusual plants, then you should have this one. A rambling or trailing plant, most often grown in a hanging basket, the large “pitchers” are green with red stripes and speckles that hide a dark secret – they are carnivorous. Insects can crawl in, but they can’t crawl out, and a pool of digestive juices await them at the bottom of the pitcher. Keep moist (avoid using untreated tap water) and in a bright window inside, but they can be brought out for the summer into partial shade.

Wooly Dutchman's Pipe — is a woody, twining vine native to the southern and central United States. It is covered in large, heart-shaped leaves, parts of which are covered in woolly hairs. This vine is dense and relatively fast growing providing welcome shade to patios and porches in the summer, but being deciduous, it will allow warm sun through during the winter. It has oddly shaped flowers that bloom in mid to late spring that are yellow-green with purple to brown accents. They need an arbor or some other structure to grow on, and are a welcome addition to butterfly gardens as they are a host plant for pipevine swallowtail butterflies. It prefers full to partial sun in moist soil with good drainage. **\$15.00**

20-30' T x 5-10' W

Zones 5-8

Pot Size: #1

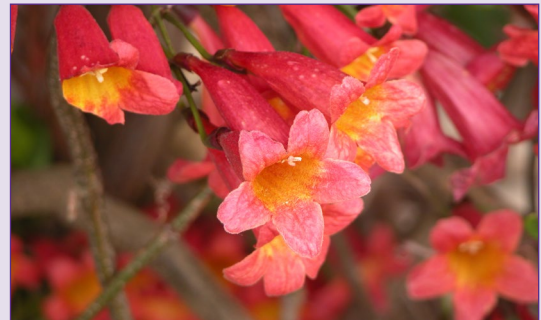

Aristolochia tomentosa
Wooly Dutchman's Pipe

'Tangerine Beauty' Crossvine — is a cultivar of the Coastal Virginia native with long, tubular, aromatic, tangerine-orange flowers that have golden yellow throats. This cultivar produces flowers in abundance attracting hummingbirds with a welcome mid-spring meal, often before other flowers are yet to open for them. This is a rapid grower, and in mild winters it may remain evergreen (though reddening somewhat), and in cold ones completely deciduous, but very hardy nonetheless. Prefers full to partial sun, but is quite tolerant of shade, moist well drained soil; drought tolerant once established. **\$20.00**

'Ville de Lyon' Clematis — An heirloom French selection, this clematis has rich, 4-6”, carmine red blooms in mid-summer to early fall. It belongs to pruning group 3 which bloom on new growth and should be pruned in mid to late winter when growth appears low on the plant, and anything above this low growth should be pruned away at this time. Clematis prefer full to partial sun in moist well drained soil. They also need to have their roots kept cool and damp, so water when needed and mulch well, or even plant them so that other plants will shade their roots. Deer resistant. **\$20.00**

Carolina Jessamine — Admired for its sweetly scented, canary yellow flowers, this vine really puts on a show late winter to early spring. The trumpet-shaped blooms are 1½ inches long and seen in small clusters, with narrow, glossy evergreen foliage which bronzes in winter. It grows best in full sun, but will tolerate shade though with fewer flowers. It also prefers consistently moist soil, but can take a brief drought; salt and deer tolerant as well. It is attractive to bees, butterflies, and other pollinators. **\$15.00**

Gelsemium sempervirens

'Margarita' Carolina Jessamine — is a cultivar of the Coastal Virginia native vine. Admired for its sweetly scented, canary yellow flowers, this vine really puts on a show late winter to early spring. The trumpet-shaped blooms are 1½ inches long and seen in small clusters, with narrow, glossy evergreen foliage which bronzes in winter. 'Margarita' has larger flowers and is more cold tolerant than the species. It grows best in full sun, but will tolerate shade though with fewer flowers. It also prefers consistently moist soil, but can take a brief drought; salt and deer tolerant as well. It is attractive to bees, butterflies, and other pollinators. **\$15.00**

Woodvamp (a.k.a. Climbing Hydrangea) — is a Coastal Virginia native vine, formerly known as *Decumaria barbara*. It features clusters of fragrant white flowers in the late spring that attract butterflies and other insect pollinators. Given the right surface to grow on, like a large tree, this plant will reach heights of 30 feet or more. It makes a great groundcover as well, but will only flower if it grows up vertically. Prefers light sun to deep shade, though it has fewer flowers in deep shade. Appreciates moist to wet soil; deer resistant. **\$15.00**

Hydrangea barbara

ROSE SENSATION® Japanese Hydrangea Vine — is elegant and distinctive, and a great choice for gardeners who want something a little different in their landscapes. This is a showier variety of Japanese hydrangea vine with larger deeper pink speals in June and July. It's a great addition to woodland settings or trained up a north facing wall or large tree. We have had great success at NBG planting these at the base of mature loblolly pines allowing them to climb. Prefers partial shade in moist well drained soils; deer resistant. **\$25.00**

'Scentsation' Honeysuckle — is a very showy vine with extremely fragrant yellow flowers that bloom from mid-spring to late summer, followed by bright red berries. This honeysuckle has a very long bloom time, and is a wonderful addition to summer gardens, especially when trained up a trellis or fence. Not invasive like Japanese honeysuckle. Does well in full sun, dappled sun, or partial shade in moist well drained soil; deer resistant, and drought tolerant once established. Attracts hummingbirds, butterflies, and other pollinators. **\$20.00**

Spring Meadow Nursery

'Amethyst Falls' American Wisteria — is a spectacular, twining, Coastal Virginia native cultivar. It grows at about a third the rate of Asian wisteria, making it better suited for smaller spaces. It is also better behaved and not invasive like Asian selections. Slightly fragrant purple racemes bloom in late spring with a lesser rebloom into summer, and plants produce flowers at an early age. It attracts butterflies, hummingbirds, and other beneficial pollinators. Great in containers for porch or patio, or trained up an arbor or trellis. Full sun to part shade in moist well drained soil; deer resistant.

Wisteria frutescens
'Amethyst Falls' American Wisteria

Kentucky Wisteria — is a North American native and another good alternative to Asian wisteria. Late in spring, it produces 6-12" long clusters of fragrant, pale violet-blue flowers. The flowers will attract hummingbirds, butterflies, and other insect pollinators. It differs from American wisteria (*Wisteria frutescens*) by having larger flowers and being more cold tolerant (not an issue in Coastal Virginia). It will do best in full sun in moist well drained soil; deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

Acer rubrum

Red Maple (a.k.a. Swamp Maple) — This is a very common native tree throughout much of North America, including Coastal Virginia. It is particularly known for its fall color which can be bright orange to deep red. It has a rounded habit with a dense crown that provides nice shade in the spring and summer. Its red, late winter flowers are an important early food source for native bees, and its seeds are eaten by birds and other animals. Easy to grow, it prefers full to part sun, and once established it is quite tolerant of adverse conditions including drought, wet soil, deer, heat, pollution, and compacted soil. **\$40.00**

40-70' T x 30-50' W

Aesculus pavia

Red Buckeye — is a Coastal Virginia native small tree. It is an early spring bloomer, and its tubular red flowers are an important food source for returning hummingbirds, but they also attract insect pollinators. Plants will begin blooming at a young age, growing slowly to create a small tree. Prefers shade to part shade; tolerant of deer and occasionally wet soils. Leaf drop in late summer is normal. **\$12.00**

Magnolia macrophylla var. ashei

Ashe Magnolia — is closely related to the bigleaf magnolia (*Magnolia macrophylla*), only it is smaller. They are very rare, native only to the Florida panhandle, but they will grow well in Coastal Virginia. It has large, light green, deciduous leaves that can get up to 2 ft long. It flowers in the early summer with huge (6-12") white, citrus-scented blossoms. They will do best in partial shade in moist well drained soil, tolerant of full sun provided adequate moisture. Shelter from strong winds keeps that large foliage looking good, adding a distinct tropical look to the landscape. **\$35.00**

Pot Size: #3 and #7

Current Plant Size:

2 ft. & 3 ft.

Magnolia stellata 'Waterlily'

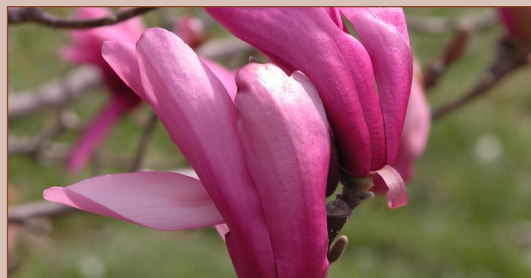

'Waterlily' Star Magnolia — has pink buds that open to fragrant white and pale pink flowers with 20-30 petals per blossom, reminiscent of water lilies. This display takes place in late winter, just when you need to see something bloom. 'Waterlily' is deciduous and can either be a large multi-stemmed shrub or small tree. Full sun in moist well drained soil is preferred. **\$75.00**

10-20' T x 8-15' W

Zones 4-8

Pot Size: #7

Current Size: 3 ft.

Magnolia x 'Ann'

'Ann' Magnolia — is part of the Little Girl series, which were bred for a later bloom time, hopefully avoiding late frost damage to the flowers. 'Ann' has lovely, slightly fragrant purple-red flowers and a shrubbier, multi-stemmed, compact habit making it good for smaller gardens and spaces. Prefers full to partial sun in moist well drained soil; deciduous. **\$50.00**

8-10' T&W

Zones 3-8

Pot Size: #3

Current Plant Size: 15-18 ft.

Prunus serotina

Black Cherry — is one of North America's most widely dispersed trees, including here in Coastal Virginia. It is also one the absolute best trees for wildlife. In the spring, clusters of mostly white flowers bloom attracting a wide variety of insect pollinators. It is also a host plant for several butterfly species. The attractive red to black fruit is relished by songbirds and mammals, and should best be left to them as it is not recommended for humans. The fall foliage can be golden yellow to orange, and its overall rustic habit makes it a handsome addition to the garden. It prefers full to part sun in moist well drained soil; deer resistant. **\$30.00**

Quercus bicolor

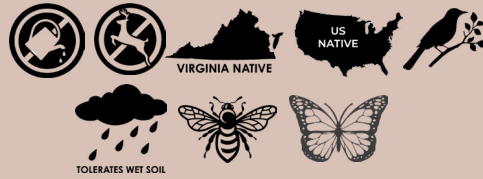

Swamp White Oak — is a Coastal Virginia native that gets its botanical name from the two-toned color of its leaves, green on top, and silvery underneath. In the fall it can turn to shades of yellow, bronze, or burgundy. Like most native oaks it is a keystone species of great value to pollinators, birds, and mammals. It prefers full sun in moist soil, it is also adaptable to occasional drought or freshwater flooding; deer resistant. **\$40.00**

50-60' T&W

Zones 4a-8b

Pot Size: #3

Current Plant Size: 3 ft.+

Quercus macrocarpa

Bur Oak — is native throughout much of North America, including parts of Virginia. Its common name comes from the “mossy” acorns that provide good food for a variety of mammals and birds. Like many oaks, it is an important host plant for a number of moths and butterflies, whose larvae become baby bird food. The fall foliage can range from golden yellow, to a coppery brown. It prefers full to partial sun in moist well drained soil; drought tolerant once established; deer resistant. **\$30.00**

70-80' T&W

Zones 3a-8b

Current Plant Size: 3 ft.

Quercus phellos

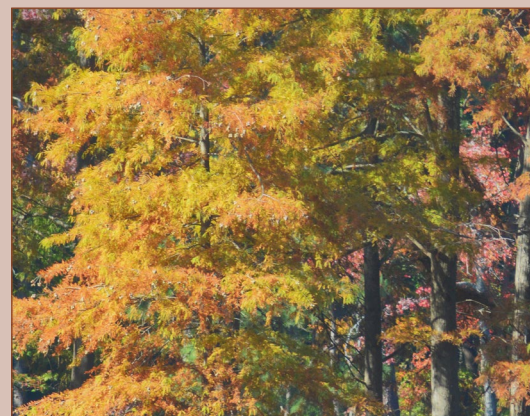

Willow Oak — is a large deciduous oak tree most widely used as a shade tree, street tree or in rain gardens. It is one of Coastal Virginia’s most common native oaks, in fact, 3 of the 4 National Champion willow oaks are located in Coastal Virginia. It is a host plant for several butterfly species, and its acorns are eaten by several bird and mammal species. It’s small, willow-like foliage turns brown in the fall, and the leaves’ small narrow size make for easy clean up compared to other oaks. Plant in full sun in moist well drained soil. Once established it is tolerant of wet and dry soil, salt, deer, and urban conditions. **\$30.00**

50-80' T x 30-40' W

Zones 5-9

Pot Size: #3

Taxodium distichum

Bald Cypress — is a stately conifer common in wetland areas throughout the Southeast, including Coastal Virginia. However, it can also adapt well to residential settings with normal soil and moisture. Unlike most cone-bearing trees, bald cypress is deciduous, but before its needles drop in the fall they turn a beautiful russet orange. Its ripe seeds will attract a variety of birds and mammals. In wet areas it will produce its characteristic cypress knees. This tree will adapt to a wide range of soil types, whether wet, dry, or swampy; very tolerant of wind, heat, and humidity. **\$30.00**

50-70'+ T x 20-45' W

Zones 4-9

Pot Size: #3

Current Plant Size: 4-5 ft.

Zanthoxylum clava-herculis

Hercules Club — is a Coastal Virginia native that can grow where it is too harsh for other trees. The visually insignificant flowers are attractive to pollinators, and the seeds are eaten by birds and mammals. The tree is the host plant for giant swallowtail butterflies. Also known as the toothache tree, the foliage has numbing properties when chewed. The most distinctive aspect of this tree is its striking, blunt thorns along the trunk, making it no fun to climb. Prefers full to part sun in moist well drained soil; heat, humidity, and drought tolerant. **\$30.00**

'Hosui' Dwarf Asian Pear — produces medium to large, yellow-russet skinned pears, ripening in mid-August. The fruit is snappy, tangy, very juicy, and keeps well in storage. Best for fresh eating but also great for pies and tarts. Beautiful white flowers in spring attract pollinators. Self-pollinating but also performs well with any another Asian pear. Plant in full sun with moist well drained soil. **\$85.00**

8-10' T x 6-7' W

Zones 5-9

Pot Size: #7

Current Plant Size: 6 ft.

Pyrus pyrifolia 'Hosui'

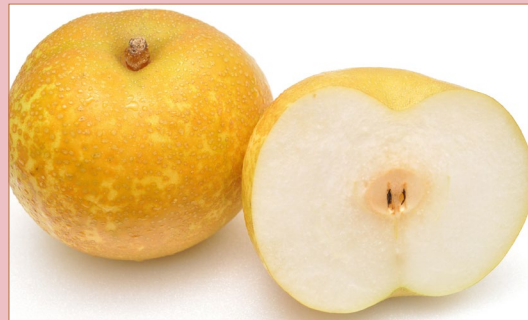

'Tsu Li' Dwarf Asian Pear — is an heirloom variety from China noted for its oblong shape, unusual for Asian pears and more like that of European pears. The flesh is crisp and juicy making it great for fresh eating, but it stores well also. Beautiful white flowers in spring attract pollinators. This variety is also fireblight resistant. Self-pollinating, but will be even more productive when another Asian pear is present. Plant in full sun with moist well drained soil. **\$85.00**

8-10' T x 6-7' W

Zones 5-9

Pot Size: #7

Current Plant Size: 4-5 ft.

Pyrus pyrifolia 'Tsu Li'

'Chester' Thornless Blackberry — produces large, very sweet fruit that ripens in July. It is great for fresh eating, jams, jellies, and baked goods. From April to May it features light pink flowers that attract a variety of pollinators. Plant in full sun in moist well drained soil. Self-pollinating. **\$35.00**

3-5' T&W

Zones 5-8

Pot Size: #1

Current Plant Size: 12 in. x 18 in.

Rubus fruticosus 'Chester'

Southern Rabbiteye Blueberries — offer multi-season interest with white to pale pink flowers in late winter that attract early pollinators, colorful (and delicious!) summer fruit, and fantastic fall foliage. They will grow in full sun to partial shade, but best fruit production will be in full sun. They must be pollinated with a different variety of southern rabbiteye blueberry, and while you are at it — plant yet another one for the birds! We will offer 3 varieties in two sizes each:

'Climax' — is an early ripening blueberry that produces medium fruit with a sweet flavor. Its growth habit is upright, and it has intense green foliage.

'Premier' — is an early to mid-season producer with large fruit that possesses excellent flavor. It is also highly productive.

'Tifblue' — is a mid-season ripening plant with medium to large berries, and an upright vigorous habit.

All varieties are **\$18.00** for a **#1** size and **\$35.00** for a **#3**.
